

A map of Boston, Massachusetts, overlaid with numerous small, multi-colored circles of varying sizes. The circles are concentrated in the central and eastern parts of the city, particularly around the downtown area and the harbor. The colors include red, orange, yellow, green, cyan, blue, purple, and pink. The map shows the city's street grid, major roads, and the surrounding water bodies (the harbor and the Charles River).

# BOSTON'S NEIGHBORHOOD BUSINESS PATTERNS

## Introduction

Boston's Neighborhood Business Patterns, produced by the Boston Redevelopment Authority (BRA), April 2006, examines patterns in private sector employment by neighborhood. It identifies Boston's leading industries, employers and the geographical location of businesses and jobs in the city. The intention of this report is to provide an overview of business concentration patterns both at the city and neighborhood levels and to provide detailed economic data that would further facilitate the implementation of informed policy making.

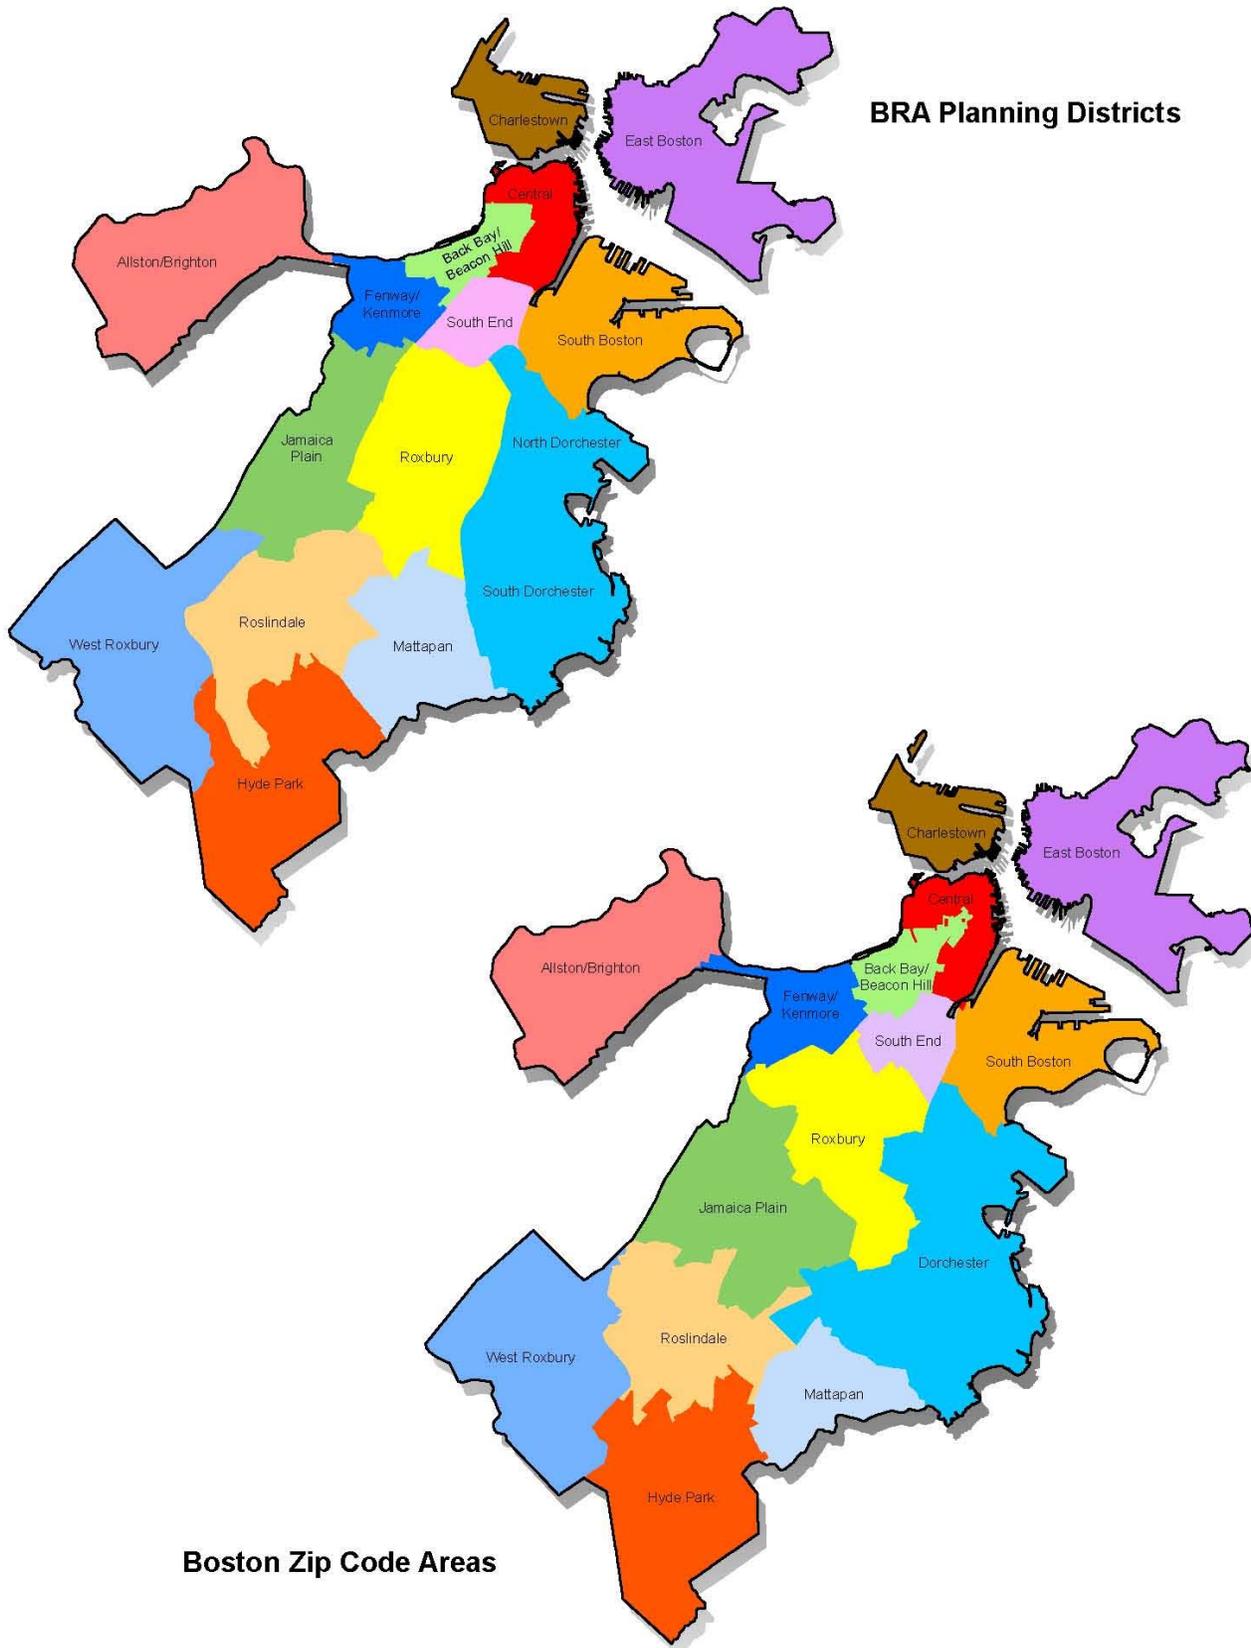

## Data and Methodology

The two main data sources used to identify business patterns include the 2002 County Business Patterns (CBP) published by the U.S. Census and InfoUSA databases. CBP data covers only 85% of Boston's employment, includes private sector payroll jobs and does not include government sector or non-payroll employment (e.g. those working in family businesses or who are self-employed). Although the CBP data are limited to private payroll establishments and employment, its coverage is complete and consistent within this major segment of the economy. The CBP dataset provides data both at the county level (e.g. Suffolk County) and at the ZIP Code level.

To create the employment maps shown in this report, we used InfoUSA data. This dataset does not enjoy the completeness or consistency of the CBP data, however. The InfoUSA dataset contains street level addresses that allow for an accurate location of the city's employers and jobs. Employment sectors in Boston have assigned codes according to the North American Industrial Classification System (NAICS) produced by the Federal Office of Management and Budget.

Boston neighborhood boundaries are determined based on ZIP Codes rather than planning districts typically used in other BRA reports. The following two maps show the difference between the two geographical boundaries. While some neighborhood boundaries are unchanged (e.g. East Boston, Charlestown, etc.), others differ significantly (e.g. Back Bay, Roxbury, Dorchester, etc.). For further details on the methodology employed, please refer to Appendix I.

The large employers list was compiled for 2004 employment using a variety of sources: Dunn and Bradstreet, New England Board of Higher Education, American Hospital Association, InfoUSA, internet research, and selected telephone interviews.

**Boston Zip Code Areas**

## Boston's Private Sector Employment and Establishments

At 589,141 Boston's population is 9.3% of the state's population and with a land area of 48 square miles it makes up just 0.6% of Massachusetts' land area. Yet, Boston generates 23.4%, nearly one-fourth, of the state's income tax revenue, 18.7% of its total tax revenue, and 688,077 jobs or 16.5% of the state's total jobs. In fact, Boston is one of the few major cities in the country that generates more jobs than it has residents. On workdays, more than 300,000 commuters from other cities and towns work at jobs generated by Boston's economy.

One reason for such a healthy and robust economy is Boston's industry diversity. Boston has a handful of leading industries that generate approximately 60% of the city's jobs and a larger number of smaller industries that make up the remainder of the city's employment. This variety insulates the city's economy against downturns and provides employment for a wide range of knowledge, talents and skills.

In terms of location, the largest percentage of jobs in Boston is located in the city's Central Business District. Significant shares are located in Boston's neighborhoods, however. This important spatial distribution of jobs contributes to Boston's economic health and supports an enhanced quality of life in the city.

For the purposes of this report, Boston's private sector employment is divided into ten industry sectors. The "big three" largest sectors, are Professional and Business Services and Information, Finance, Insurance and Real Estate (F.I.R.E.) and Health Care and Social Assistance. Boston's industry sectors in terms of employment size (2002) and their growth rates (1998 through 2002) are as follows:

- **Professional and Business Services and Information** - the largest in Boston, accounts for 129,653 jobs or 23.7% of all private sector employment. This sector grew by 7.4%;
- **Finance, Insurance and Real Estate** - the second largest sector generates 115,576 jobs (21.2%) and grew by 7.4%;
- **Health Care and Social Assistance** - the third largest sector in Boston, accounts for 105,059 (19.2%) of the total private-sector jobs and grew by 3.4%;
- **Leisure and Hospitality** - accounts for 52,534 jobs (9.6%), and grew by 8%;
- **Educational Services** - accounts for 31,798 jobs (5.8%), unlike the others it decreased by 1.7%;
- **Wholesale and Transportation** - generates 28,486 jobs (5.2%), and grew at a rate of 2%;
- **Retail Trade** - provides 27,751 jobs (5.1%), and grew by 5.1%;

- **Utilities and Construction** - provides 15,909 jobs (2.9%), and grew at a rate of 7.3%;
- **Manufacturing** - accounts for 14,009 jobs (2.6%), and decreased by 24.2%; and
- The remaining industries are aggregated and classified as **“Other.”** These jobs generally reside in personal services firms. The “other” category accounts for 25,273 jobs (4.6%), and a growth rate of 15.9%.<sup>1 & 2</sup>

Boston’s economic specialization, measured by its industry’s Location Quotient (LQ), shows that the city’s strengths are mainly in the areas of F.I.R.E. (2.82), Educational Services (2.42), Health Care & Social Assistance (1.45), and Professional, Business Services & Information (1.22) - Table 1. The LQ shows the degree of concentration of industry-economic specialization and compares the city industry concentration (employment in this industry as a percentage of the total jobs in Boston) to the national average concentration for this industry. The sectors with a LQ greater than 1 indicate a higher concentration for that industry in Boston than throughout the U.S. All industries with a LQ greater than 1, with the exception of Educational Services show positive growth rates. Educational Services has rebounded in recent years with an 8.5% gain in employment since 2002, however.

**Table 1- Private Sector Employment in Boston**

Sector	Number of Employees 1998	Number of Employees 2002	Share of Total Employment 2002	% Change 1998 – 2002	Location Quotient 2002
Prof./Bus. Services & Info.	120,734	129,653	23.70%	7.40%	1.22

**Source:** County Business Patterns, U.S. Department of Commerce, Boston Redevelopment Authority, Research Division Analysis

<sup>1</sup> The North American Industry Classification System (NAICS) employment codes used to define each sector are as follows: Professional and Business Services and Information: 51, 54, 55 and 56; Finance, Insurance and Real Estate (F.I.R.E.): 52, 53; Health Care and Social Assistance: 62; Leisure and Hospitality: 71, 72; Educational Services: 61; Wholesale and Transportation: 42, 48; Retail Trade: 44, 45; Utilities and Construction: 22, 23; Manufacturing: 31, 32, 33; and Other: 11, 21, 81, 95, 99.

<sup>2</sup> The NAICS employment codes for the “Other” sector include: Forestry, Fishing, Hunting and Agriculture Support: 11; Mining: 21; Other Services (except public administration): 81; Auxiliaries (except corporate, subsidiary and regional management): 95; and Unclassified: 99.

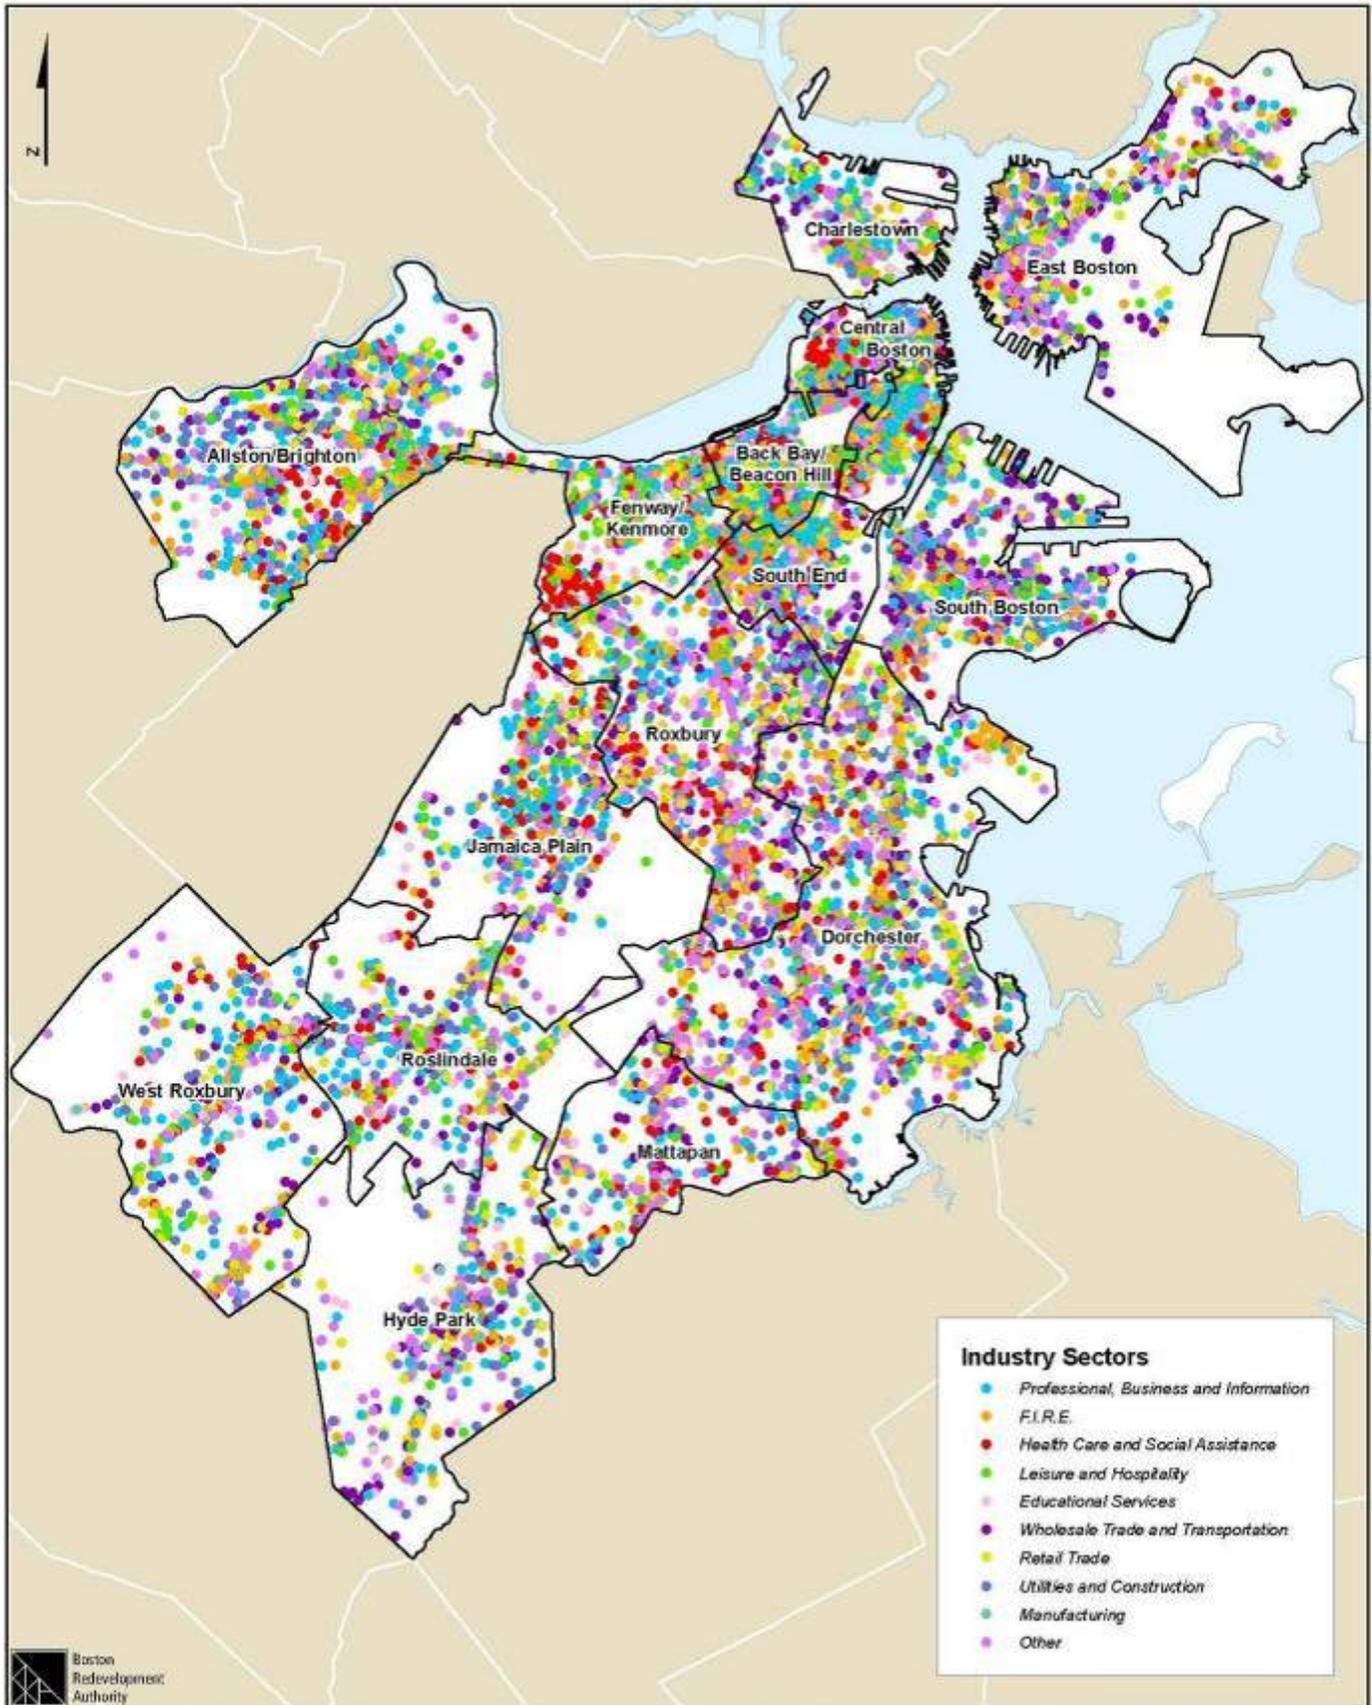

Boston is home to 18,583 private payroll establishments. Professional and Business Services and Information have the largest share (26%) of the city's total establishments followed by F.I.R.E. (13%), Retail Trade (12%) and Leisure and Hospitality (12%).

Employers with 1-100 employees dominate the largest share of Boston's establishments. These employers make up 95% of the total establishments in the city. On the other hand, the largest employers (1000 and more), constitute only 0.3% of Boston's total establishments.

## **Spatial Distribution of Boston's Employers and Employment**

As stated, while most of Boston's private sector employers are concentrated in Central Boston there is a significant number and large diversity of employers distributed across the city's neighborhoods. Mapping the concentration and diversity of employers by location and industry provides an insightful picture of Boston's economy - Map 1.

**Map 1. Establishments in Boston by Industry Sector**

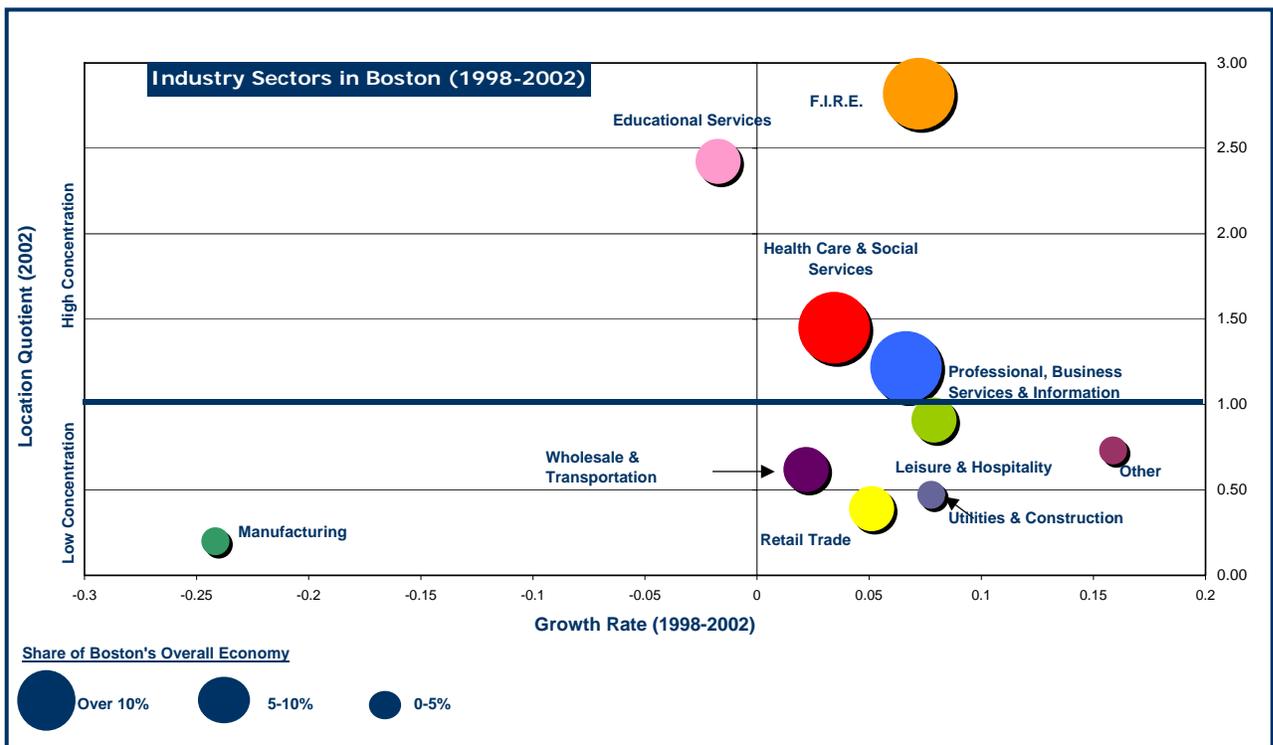

Sources: American Business Index 2004, BRA Research Division Analysis, BRA Office of Digital Cartography & GIS

## Employment Size and Growth

The size of Boston's leading sectors vary – from the “big three” of Professional and Business Services and Information, Finance, Insurance and Real Estate, and Health Care and Social Assistance to the smaller sectors that include Utilities and Construction and Manufacturing. In addition, growth rates vary among sectors. For example, between 1998 and 2002 the fastest growing industries in terms of employment growth were Leisure and Hospitality (8%); Finance, Insurance and Real Estate (7.4%); and Professional and Business Services and Information (7.4%). While most industries grew by more modest percentages, some declined - Figure 1.

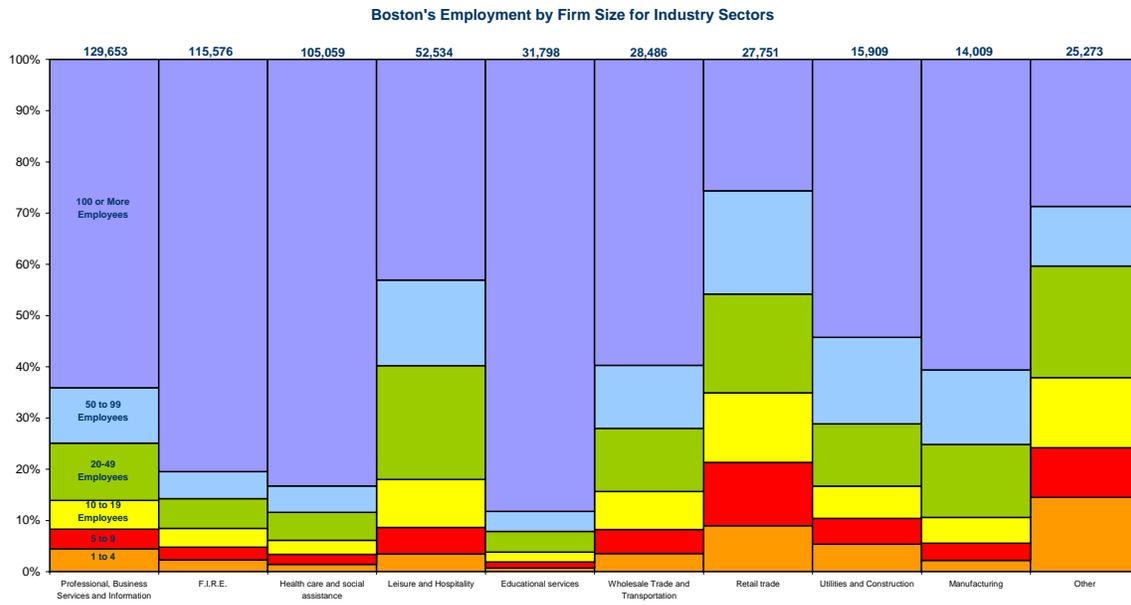

Figure 1

Source: U.S. County Business Patterns, 2002, BRA Research Division Analysis

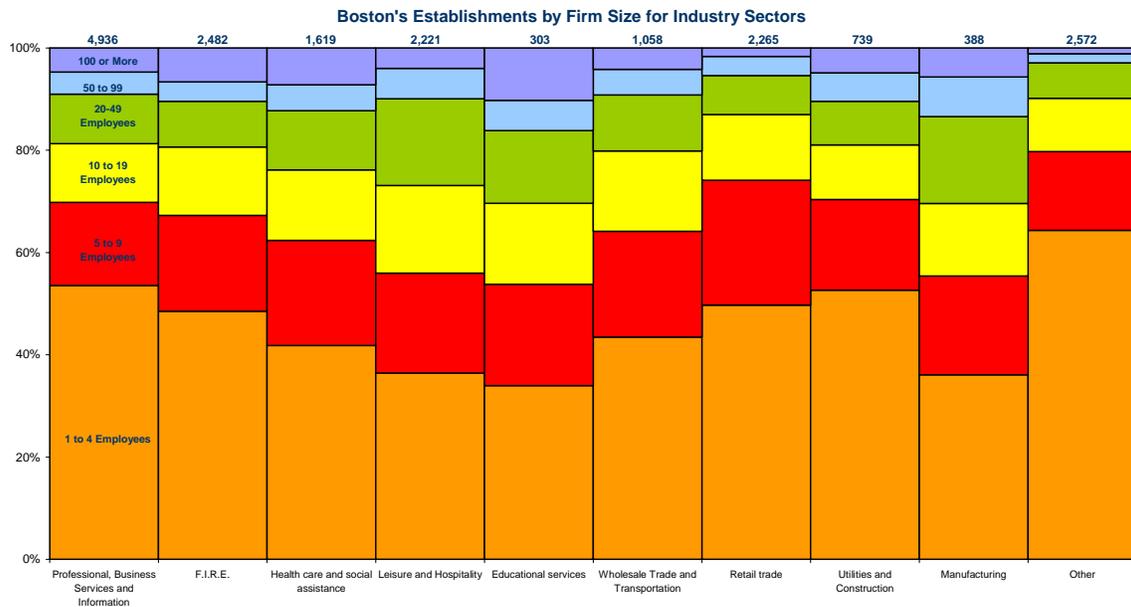

Boston is a city with a considerable number of large employers (100 and more) including the largest employers (1000 and more). While these employers make up only 0.3% of the total establishments in the city, they account for more than one-third (33.7%) of total private sector jobs. However, Boston is overwhelmingly a city of very small employers with almost half (49.5%) of its employers listed as having 1-4 workers employing only a very small percentage (3.7%) of the city's private sector employees - Figures 2 and 3.

**Figure 2**

Source: U.S. County Business Patterns, 2002, BRA Research Division Analysis

**Figure 3**

Source: U.S. County Business Patterns, 2002, BRA Research Division Analysis

Boston's largest employers (establishments) are concentrated in the following sectors: Health Care and Social Assistance (15); Finance, Insurance and Real Estate (13); and Professional and Business Services and Information sectors (11) - Table 2.

## Boston's Employment to Population Ratio

Boston's private employment-to-population ratio was 0.93 - more than twice that of the United States as a whole (0.40) and almost twice that of the Commonwealth of Massachusetts (0.48).

The distribution of private sector jobs is spread unevenly across the city, and the private employment to population ratio varies from neighborhood to neighborhood. For example, Central Boston and Back Bay/Beacon Hill are home to a majority (52%) of the city's private sector jobs and these two neighborhoods have the highest employment-to-population ratios (6.68 and 4.04 respectively) in the city - Table 3. By contrast, the more residential neighborhoods of Dorchester, Roxbury, Jamaica Plain, Roslindale, Mattapan, and West Roxbury combined account for only 13% of the city's private sector jobs. Mattapan has the smallest employment-to-population ratio of any Boston neighborhood - at 0.06.

**Table 3 – Boston’s Employment to Population Ratio, 2002**

Neighborhood	Population in 2000	Employment in 2002	Employment-to-Population Ratio
Central Boston	27,509	183,650	6.68
Back Bay/Beacon Hill	24,133	97,570	4.04
Fenway/Kenmore	47,449	78,107	1.65
South Boston	30,048	35,686	1.19

## Citywide and Neighborhood Business Patterns

The analysis reveals several predominant business patterns in Boston.

- Between 1998 and 2002, Boston’s private employment grew at a higher rate (5.5%) than that of Massachusetts (3.4%) and the U.S. (4.0%).
- Boston’s large employers (100 or more) account for a small number of establishments but generate the largest share of employment. In addition, Boston’s small employers (1-4) account for a large number of establishments yet generate the smallest share of employment - Figures 2 and 3.
- Four out of ten sectors in Boston have a higher degree of concentration than that of the country as a whole. These are the sectors with a LQ greater than 1 and include, F.I.R.E., Educational Services, Health Care and Social Assistance, and Professional and Business Services and Information.
- Employment-to-population ratios vary widely across Boston’s neighborhoods. The largest concentration of jobs are found in Boston’s Central and Back Bay/Beacon Hill neighborhoods where there is an employment-to-population ratio of 6.7 and 4.0, respectively. The most residential neighborhoods – Dorchester, Roxbury, Jamaica Plain, Roslindale, Mattapan, and West Roxbury combined contribute 13% to the city’s total jobs and have an employment-to-population ratio of 0.22.

To better visualize the city-wide employment distribution and concentration, maps depicting each of the ten industry sectors follow - Maps 2-11.

Mapping the spatial distribution of Boston’s industry sectors provides a backdrop for understanding the economy of Boston’s neighborhoods. This section of the

report concentrates on business patterns among industry sectors within Boston's neighborhoods.

Individual industry sectors have unique characteristics relative to each neighborhood - Tables 4 and 5. Jobs generated by specific sectors are highly concentrated in some neighborhoods. The location of jobs by their respective sectors and their concentration within the neighborhoods reveals the following patterns:

- The majority of jobs in the **Health Care** sector are found in two neighborhoods of the city, Fenway/Kenmore (31%) and Central Boston (28%). The largest employers (1000 or more employees) dominate this industry generating 60% of health care jobs in the city. The largest employers in this sector also dominate employment in Central Boston (82%), Fenway/Kenmore (79%), the South End (69%) and Roslindale (67%).
- Most **Finance, Insurance and Real Estate** jobs are concentrated in Central Boston (67%) and Back Bay/Beacon Hill (21%). The largest employers provide half of the jobs in this sector (50%), especially for those involved in finance and insurance. The largest employers in this sector also dominate employment in Charlestown (63%) and Central Boston (60%).
- The majority of jobs in **Professional and Business Services and Information** reside in Central Boston (37%) and Back Bay/Beacon Hill (27%). The largest employers generate only 21% of these jobs citywide, but they also generate almost half of the jobs in the South End (48%).
- More than half of the jobs in **Manufacturing** are located predominantly in South Boston (33%), the South End (20%), and Allston/Brighton (14%). The largest employers account for nearly one third of the jobs in this sector and also dominate employment in the South End (64%) and South Boston (50%) neighborhoods.
- More than half of the jobs in **Wholesale and Transportation** are concentrated in East Boston (42%) and South Boston (14%). The largest employers account for more than 30% of these jobs citywide. Largest employers in this sector also dominate employment in East Boston (63%) and Back Bay/Beacon Hill (61%).
- Half of the jobs in the **Utilities and Construction** sector are located in three neighborhoods, South Boston (21%), Dorchester (17%), and Central Boston (13%). The large employers in the 100-249 size-class account for the highest percentage (24%) of these jobs in the city. These employers also dominate employment in Roslindale (62%). While largest employers generate only 6% of employment in this sector in the city, they dominate employment in Allston/Brighton (56%).

- Nearly 70% of the jobs in the **Leisure and Hospitality** industry sector are located in Back Bay/Beacon Hill (29%), Central Boston (22%) and Fenway/Kenmore (18%). Employers in the 20-49 size-class generate more than one in five of all jobs in this industry sector in the city. These employers also dominate employment in this sector in West Roxbury (50%) Allston/Brighton (38%), Dorchester (35%), Mattapan (34%) and the South End (32%).
- Jobs in **Educational Services** are highly concentrated in the Fenway/Kenmore (63%) neighborhood. The largest employers in this sector account for 65% of this sector's jobs in the city. The largest employers also dominate Educational Services employment in Fenway/Kenmore (75%), Central Boston (74%), and Allston/Brighton (66%).
- Jobs in **Retail Trade** are distributed most evenly across the city with Back Bay/Beacon Hill at 24%, followed by Dorchester (13%), Central Boston (12%) and Allston/Brighton (12%). There are no employers with over 500 employees. The largest share of jobs in this sector is generated by small to mid sized employers with the 50-99 size-class being the highest (20%). The Retail Trade's largest employers also dominate employment in Jamaica Plain (37%), Mattapan (29%) and Hyde Park (29%).

**Table 4 – Employment in Boston's Neighborhoods by Sector**

Neighborhood	Total Employed	Healthcare & Social Assistance	F.I.R.E.	Professional and Business Services and Information	Manufacturing	Wholesale and Transportation	Utilities and Construction	Leisure and Hospitality	Educational Services	Retail Trade	Other

## Neighborhood Profiles

Each of the following neighborhoods has a unique profile:

**Allston/Brighton**

**Back Bay/Beacon Hill**

**Central Boston**

**Charlestown**

**Dorchester**

**East Boston**

**Fenway/Kenmore**

**Hyde Park**

**Jamaica Plain**

**Mattapan**

**Roslindale**

**Roxbury**

**South Boston**

**South End**

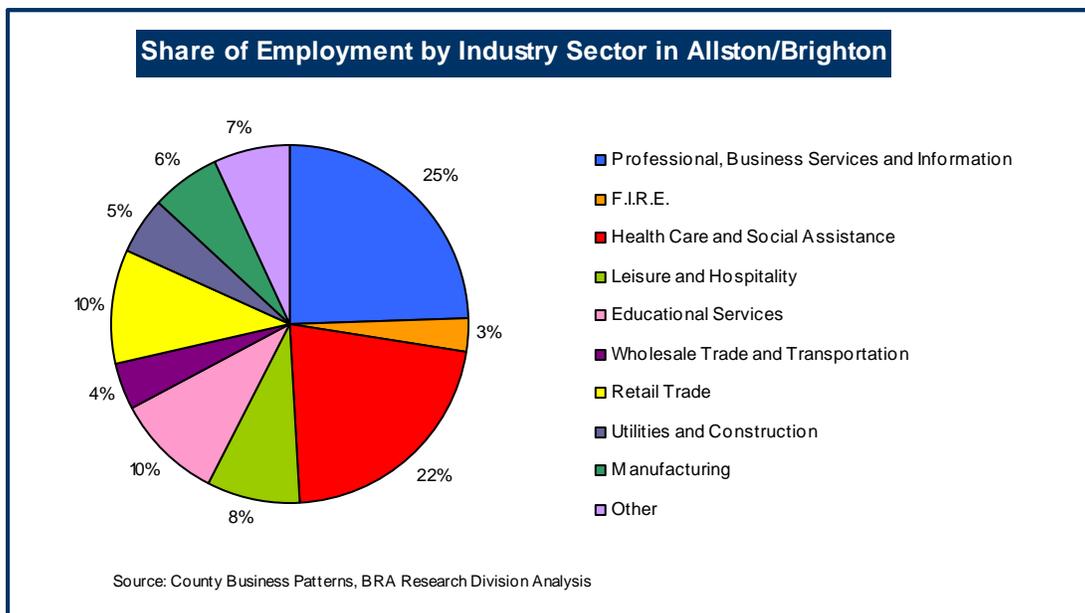

**West Roxbury**

In addition to the neighborhood summaries that follow, **Appendix III** of this report includes tables of establishments and estimated employment counts by industry and size class for each neighborhood.

Please note, employment numbers in the Appendix tables may differ slightly (by one or two jobs) from the numbers in the main body of the text. This is due to the midpoint estimation method, described in detail in **Appendix II – Data and Methodology** that sometimes calculates a fractional number of jobs. As a result, some rows or columns may not exactly add to totals due to rounding.

## Allston/Brighton

**Allston/Brighton** is home to 1,286 establishments with the majority in Professional, Business Services and Information (236) and Retail Trade (187), followed by Leisure and Hospitality (185) and Health Care and Social Assistance (142). This neighborhood has the largest number of jobs among Boston's non-downtown neighborhoods 30,885, 6% of all jobs in Boston in 2002. The largest percentage of jobs (24%) is in the Professional, Business Services, and Information sector. The second largest (22%) are in Health Care and Social Assistance, many of them provided by one largest employer, Saint Elizabeth's Medical Center. Retail Trade provides 10% of the jobs, all of them in establishments with fewer than 250 employees.

### The Neighborhood's Top Employers:

- St. Elizabeth's Medical Center
- WGBH
- American Cleaning Co.
- Franciscan Children's Hospital
- Mass. Electrical Construction Company

In terms of the degree of industry concentration and specialization, Allston/Brighton has high levels in three sectors: Educational Services; Health Care and Social Assistance; and Professional, Business Services and Information.

The Allston/Brighton neighborhood includes 479 acres of commercial and industrial land, which results in a ratio of 3 businesses and 65 employees per

acre. Its employee per establishment ratio is 24. Furthermore, the Allston/Brighton neighborhood contributes more than \$2 billion in commercial property tax revenues annually.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration, and establishments.

### Employment by Industry Sectors – Allston/Brighton

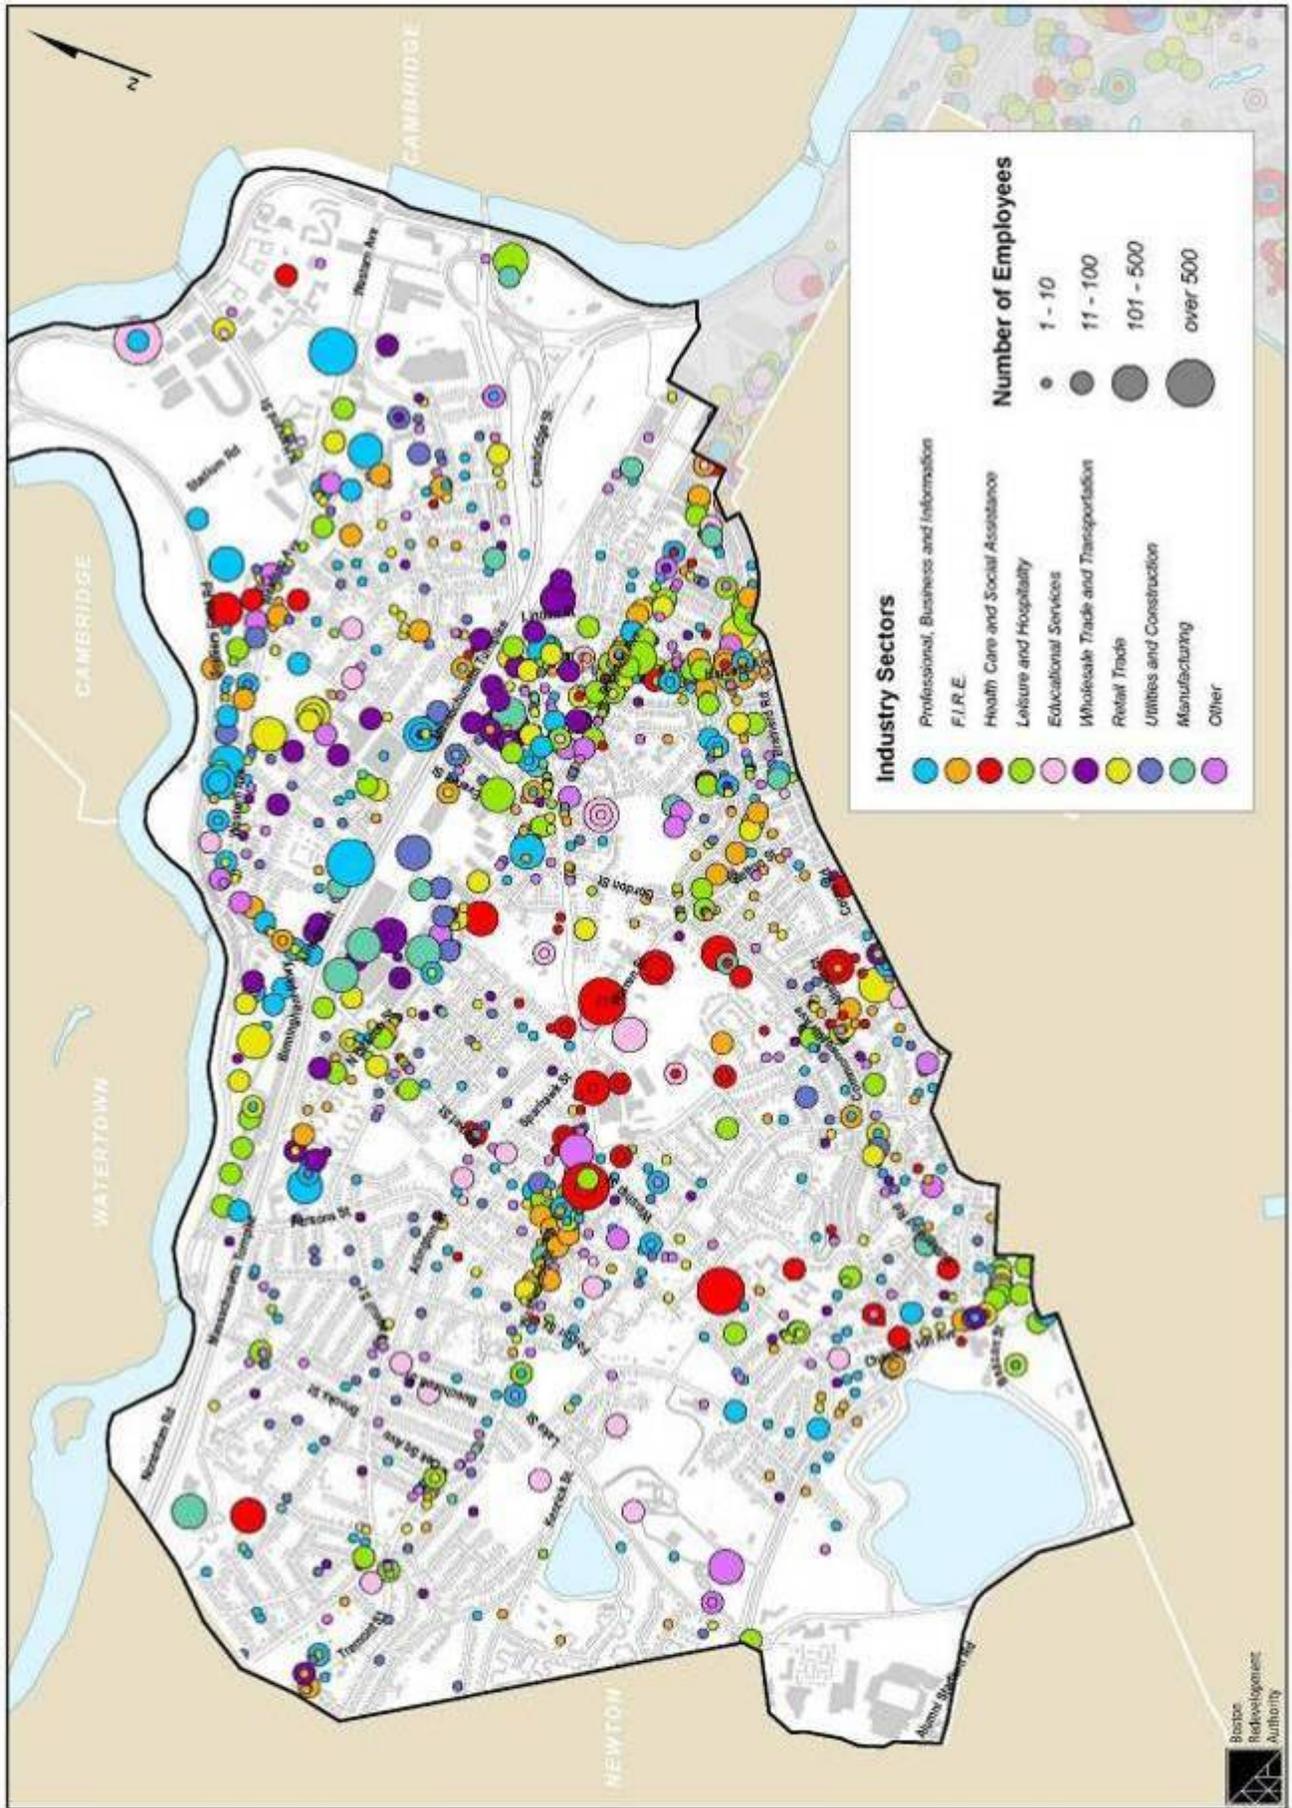

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector
Professional, Business Services and Information	7,510	24.30%	236
F.I.R.E.	976	3.20%	129

## Jamaica Plain

**Jamaica Plain** is another of the most residential neighborhoods in Boston. It is home to 662 establishments most of which are concentrated in Health Care and Social Assistance (139), Professional, Businesses Services and Information (109), and Other (134). This neighborhood records the highest concentration of jobs in a single sector – 58% in Health Care and Social Assistance. The second most important sectors for neighborhood employment are Professional and Business Services and Information (13%) and Other (8%).

### The Neighborhood's Top Employers:

- U.S. Veterans Hospital
- Faulkner Hospital
- Angell Memorial Animal Hospital
- Sherrill House Nursing Home
- Blessed Sacrament School

In terms of the degree of industry concentration and specialization, the Jamaica Plain neighborhood has levels that are high in Health Care and Social Assistance.

Jamaica Plain includes 137 acres of commercial and industrial land, which results in a ratio of 5 businesses and 87 employees per acre. Its employee per establishment ratio is 18. Furthermore, the Jamaica Plain neighborhood contributes over \$356 million annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sector – Jamaica Plain

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector
Professional, Business Services and Information	1,471	12.50%	109
F.I.R.E.	236	2.00%	44

# Mattapan

**Mattapan** is home to 251 establishments with most of them concentrated in Retail (53) and Other (67) industries. With only 1,780 jobs and an employment-to-population ratio of only 0.06, Mattapan is the most residential of all Boston neighborhoods. Mattapan depends the most on Retail for employment (26%), followed by Health Care and Social Assistance (23%) and Other (15%). There are no employers in the neighborhood with more than 100 employees.

## The Neighborhood's Top Employers:

- Shaw's Supermarket
- Rosscomon Extended Care Center
- Mars Farmers Market
- Mattapan Community Health Center
- Brooks Drugstore

In terms of the degree of industry concentration and specialization, the Mattapan neighborhood has levels that are high in three sectors: Retail Trade; Health Care and Social Assistance; and Utilities and Construction.

The Mattapan neighborhood includes 96 acres of commercial and industrial land, which results in a ratio of 3 businesses and 19 employees per acre of land. Its employee per establishment ratio is 7. Furthermore, the Mattapan neighborhood contributes \$220 million annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – Mattapan

# Roslindale

**Roslindale** is home to 417 establishments with the largest number of them in Retail (78), followed by Health Care and Social Assistance (58), and Leisure and Hospitality (44). Roslindale is the second most residential neighborhood in Boston with only 5,082 jobs. Like Jamaica Plain, it has a very large percentage of jobs in the Health Care and Social Assistance sector (40%). Other significant sectors that host a large percentage of jobs in the neighborhood are Leisure and Hospitality (15%) and Retail Trade (12%).

## The Neighborhood's Top Employers:

- Hebrew Rehabilitation Center
- Bay State Taxi
- Gourmet Caterers Inc.
- Kinetic Systems
- Brooks Pharmacy

In terms of the degree of industry concentration and specialization, the Roslindale neighborhood has levels that are high in three sectors: Health Care and Social Assistance; Utilities and Construction; Leisure and Hospitality.

Roslindale includes 89 acres of commercial and industrial land, which results in a ratio of 5 businesses and 57 employees per acre of land. Its employee per establishment ratio is 12. Furthermore, the Roslindale neighborhood contributes over \$264 million annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – Roslindale

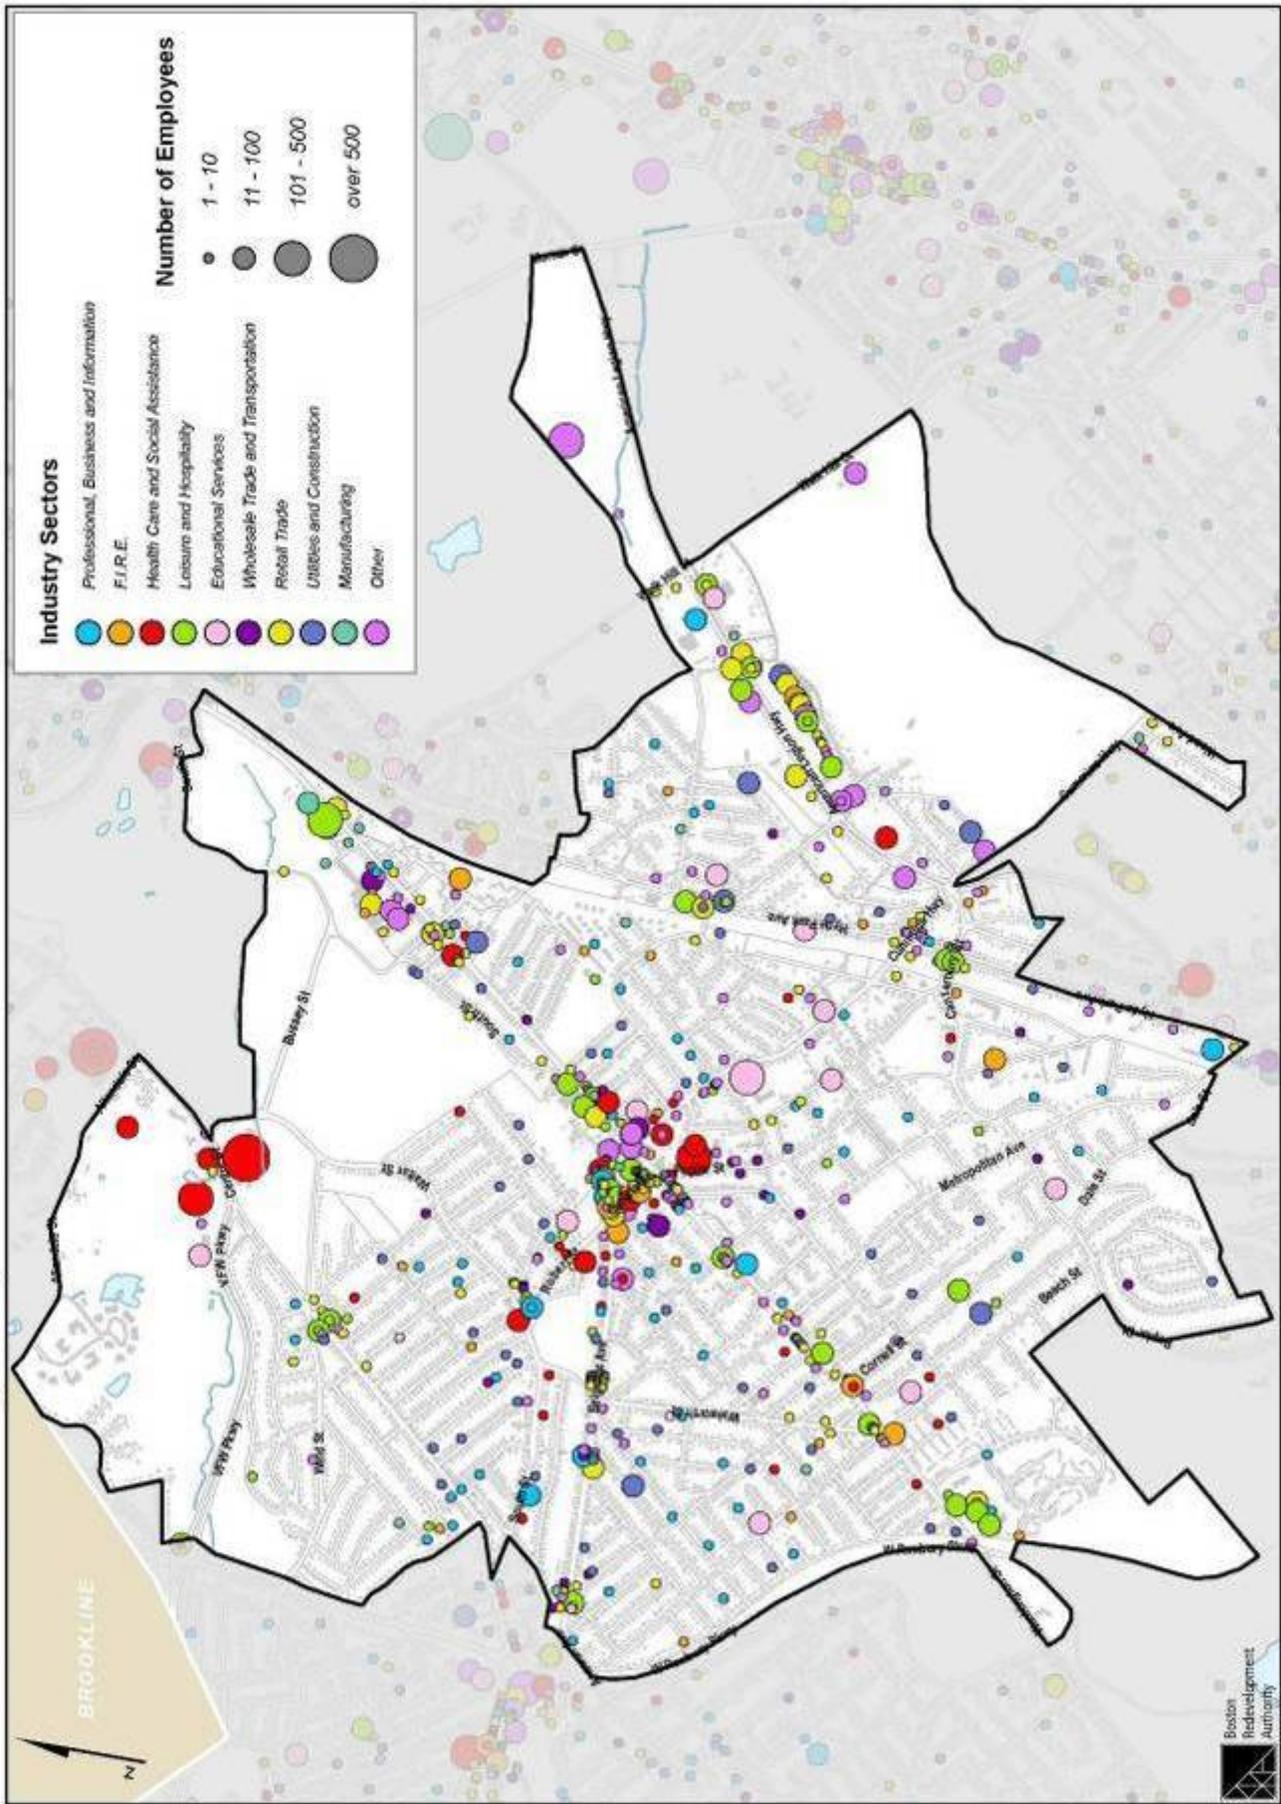

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector

# Roxbury

**Roxbury** is home to 755 establishments most of which are concentrated in Health Care and Social Assistance (147). It has 13,382 jobs or 3% of total jobs in Boston. Health Care and Social Assistance (33% of all neighborhood jobs) is the largest sector, even though there are no large employers in this sector in the neighborhood. Professional and Business Services and Information (22%) are the second largest sector. Utilities and Construction account for 9% of the neighborhood's jobs.

## The Neighborhood's Top Employers:

- Dimock Community Health Center
- New England Baptist Hospital
- Morgan Memorial Goodwill Services
- Suffolk Construction
- Radius Specialty Hospital

In terms of industry concentration and specialization, the Roxbury neighborhood has levels that are high in three sectors: Health Care and Social Assistance; Utilities and Construction; and Professional, Business Services and Information.

Roxbury has 221 acres of commercial and industrial land, which results in a ratio of 3 businesses and 61 employees per acre of land. Its employee per establishment ratio is 18. Furthermore, the Roxbury neighborhood contributes \$912 million annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – Roxbury

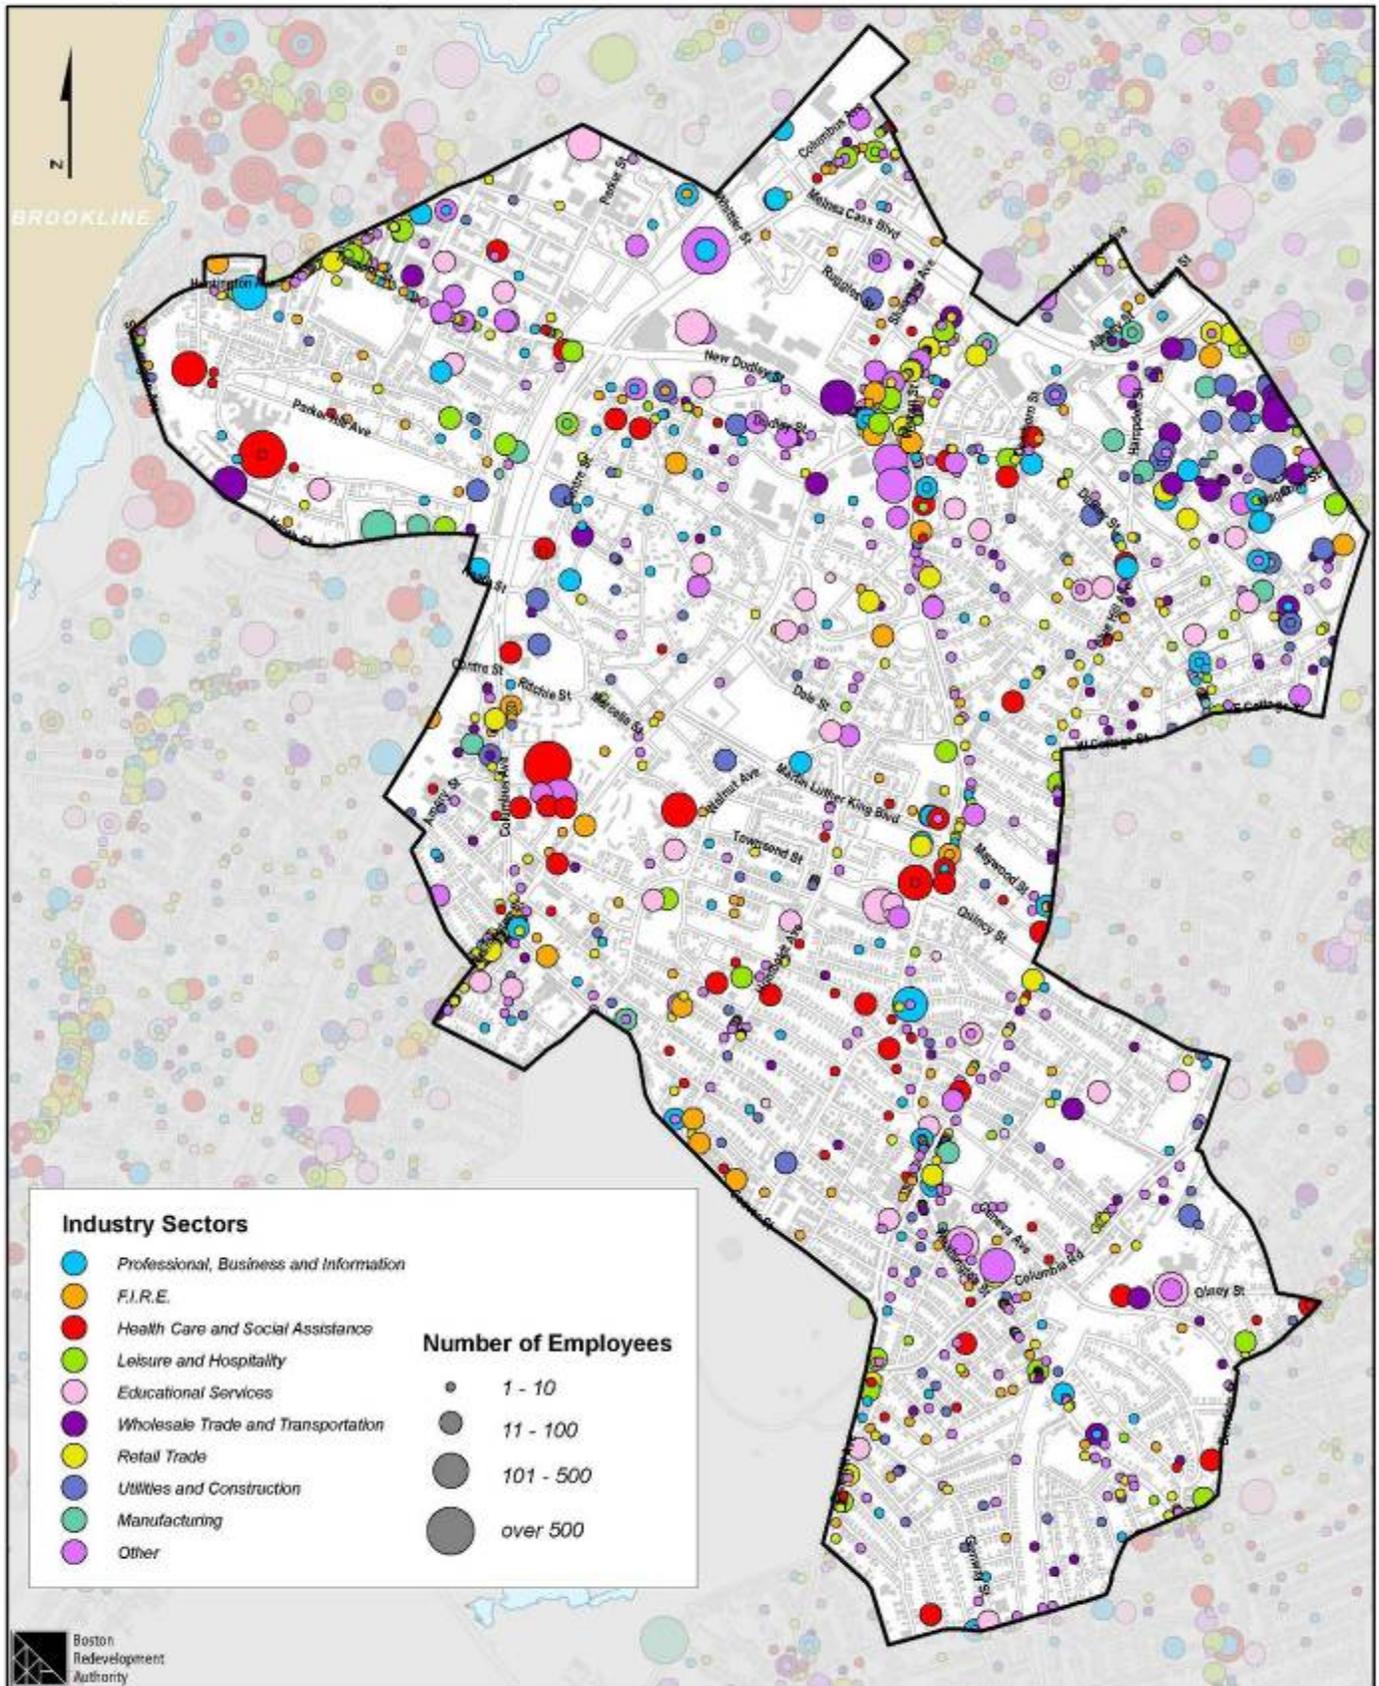

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector
Professional, Business Services and Information	2,929	21.90%	67
F.I.R.E.	657	4.90%	62

## South Boston

**South Boston** is home to 1,351 establishments with the highest number of them in the Professional, Business Services and Information sector (399). This neighborhood generated 35,686 jobs, or 7% of employment in Boston. The largest sector is Professional and Business Services and Information (31%) followed by Manufacturing (13%) and F.I.R.E. (12%).

### The Neighborhood's Top Employers:

- Gillette
- American Building Maintenance
- Manulife
- Fidelity Investments
- Thompson Corporation

In terms of industry concentration and specialization, the South Boston neighborhood has levels that are high in five sectors: Professional, Business Services and Information; F.I.R.E; Utilities and Construction; and Wholesale Trade and Transportation.

South Boston includes 456 acres of commercial and industrial land, which results in a ratio of 3 businesses and 78 employees per acre of land. Its employee per establishment ratio is 26. Furthermore, the South Boston neighborhood contributes over \$4 billion annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – South Boston

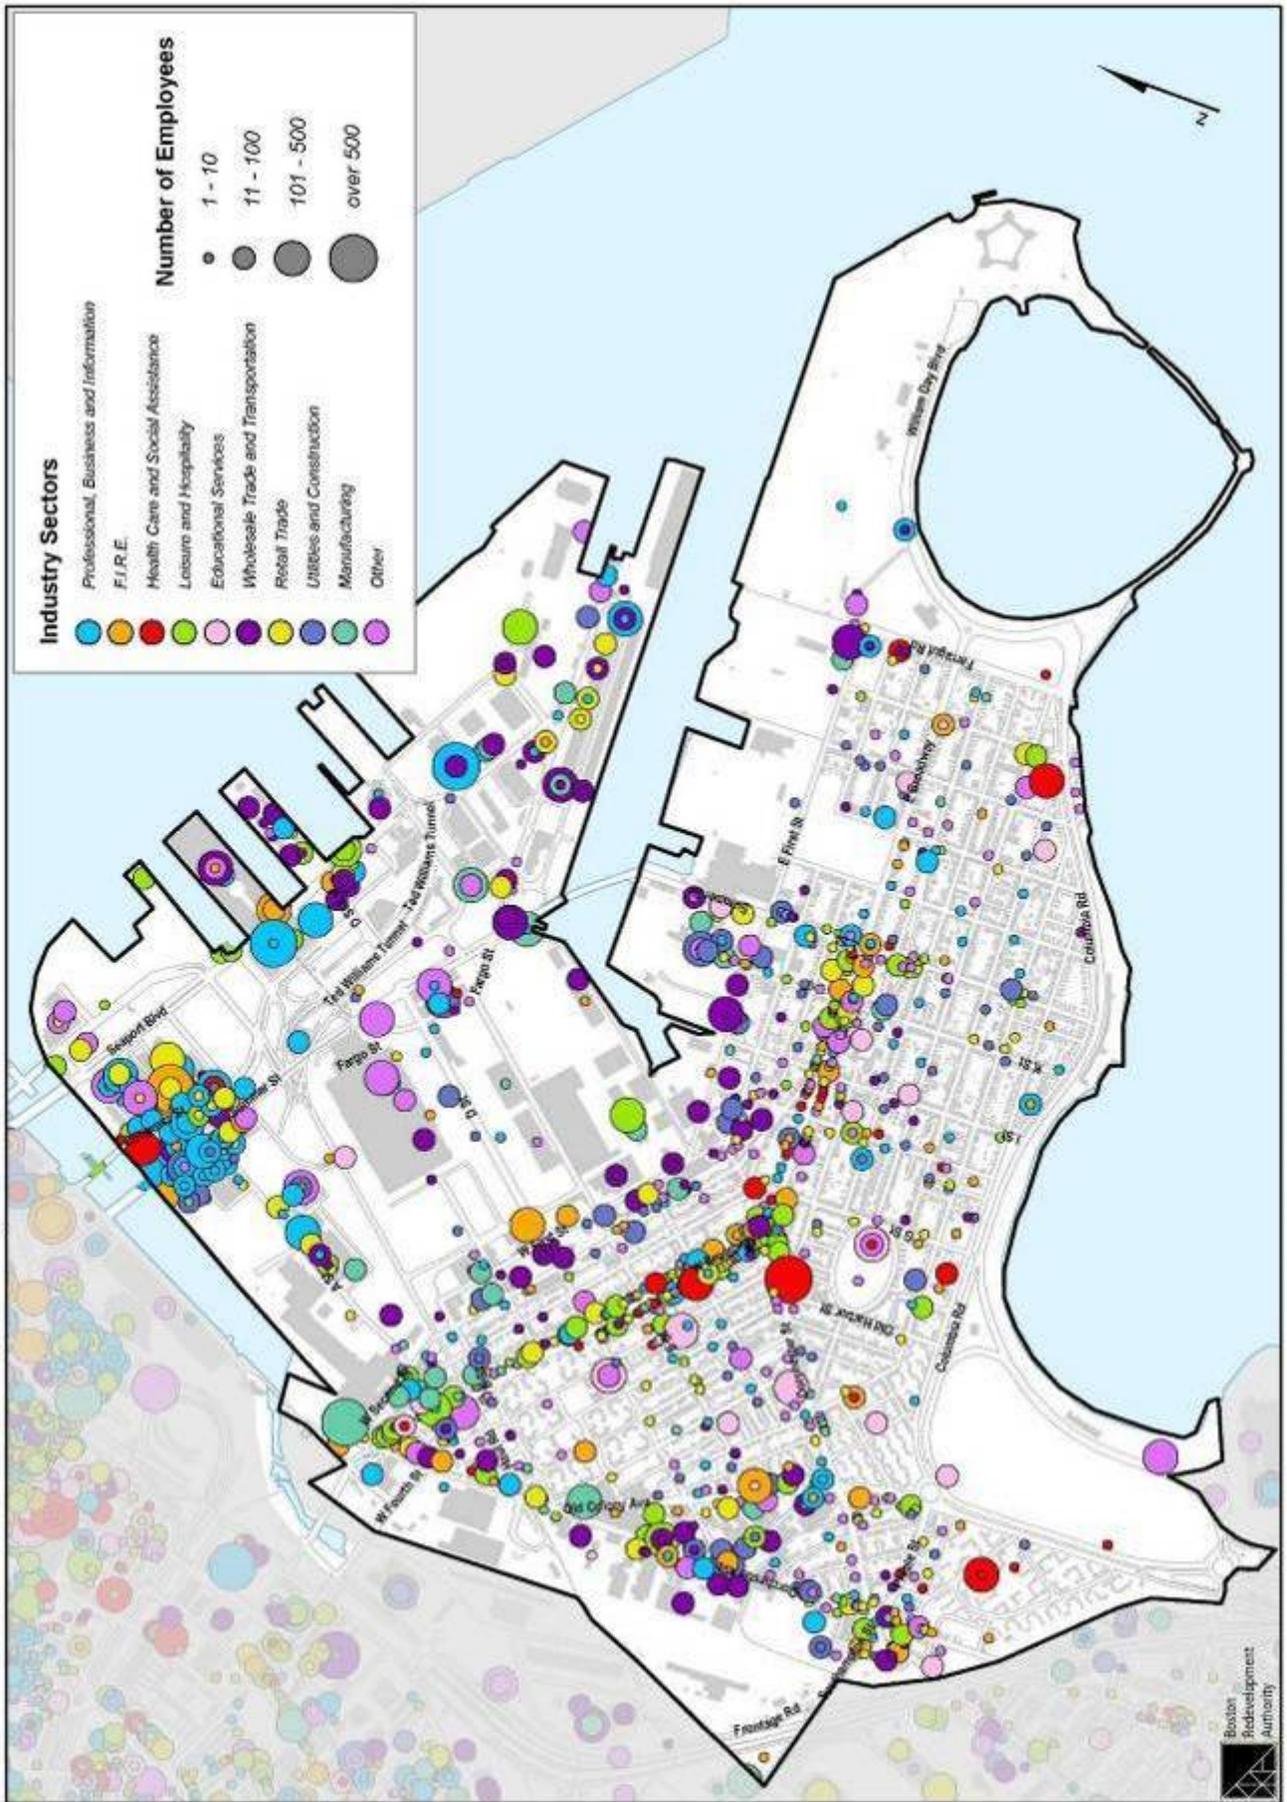

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector
Professional, Business Services and Information	11,116	31.10%	399
F.I.R.E.	4,230	11.90%	132

## South End

The **South End** is home to 706 establishments with the largest number of them in Professional, Business Services and Information (151). Its largest source of jobs is the Health Care and Social Assistance sector (42%). Professional and Business Services and Information account for 19% of the neighborhood's jobs. The Manufacturing sector accounts for 14% of all jobs, the highest percentage of any Boston neighborhood.

### The Neighborhood's Top Employers:

- Boston Medical Center
- Boston Herald
- Teradyne
- B.U. School of Medicine
- Perkin Elmer LAS Inc.

In terms of industry concentration and specialization, the South End neighborhood has levels that are high in four sectors: Health Care and Social Assistance; Manufacturing; Wholesale Trade and Transportation; and Professional, Business Services and Information.

The South End includes 108 acres of commercial and industrial land, which results in a ratio of 7 businesses and 186 employees per acre of land. Its employee per establishment ratio is 29. Furthermore, the South End contributes \$803 million annually in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – South End

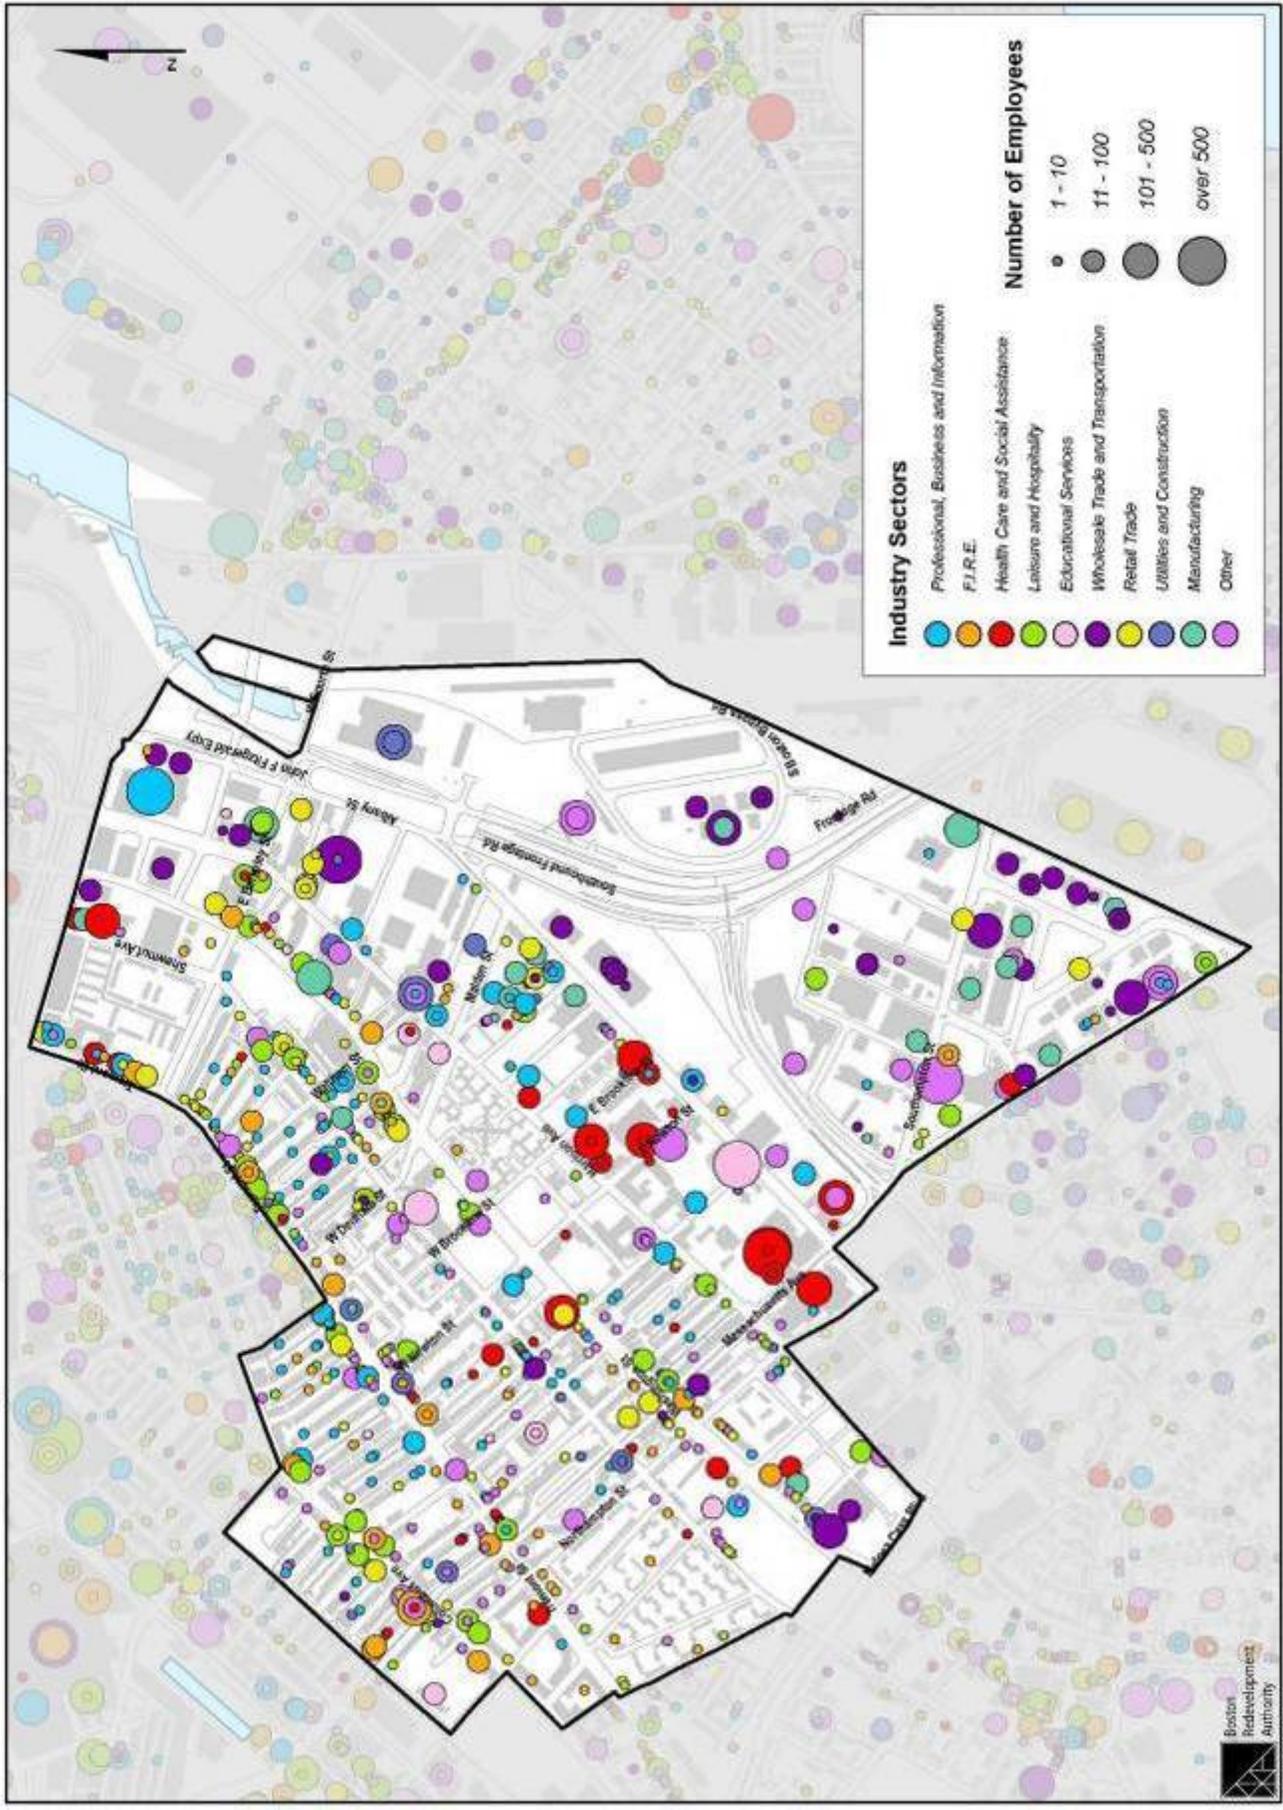

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector
Professional, Business Services and Information	3,826	19.00%	151

## West Roxbury

**West Roxbury** is another of Boston's most residential neighborhoods. It is home to 465 establishments with the largest numbers of them in the Retail Trade Sector (73). This sector also the largest percentage of neighborhood jobs (24%). Health Care and Social Assistance (15%) and Utilities and Construction (14%) are the second and third largest sectors.

### The Neighborhood's Top Employers:

- UNO Restaurant Holdings Corporation
- Home Depot
- Clair Auto Dealerships
- U.S. Veterans Administration Hospital
- YMCA

In terms of industry concentration and specialization, the West Roxbury neighborhood has levels that are high in six sectors: Utilities and Construction; Educational Services; Retail Trade; Other; Health Care and Social Assistance; and Leisure and Hospitality.

West Roxbury includes 237 acres of commercial and industrial land, which results in a ratio of 2 businesses and 30 employees per acre of land. Its employee per establishment ratio is 15. Furthermore, the West Roxbury neighborhood contributes over \$500 million in commercial property tax revenues.

The following table is an illustration of this neighborhood's strengths as it relates to employment, industry concentration and establishments.

### Employment by Industry Sectors – West Roxbury

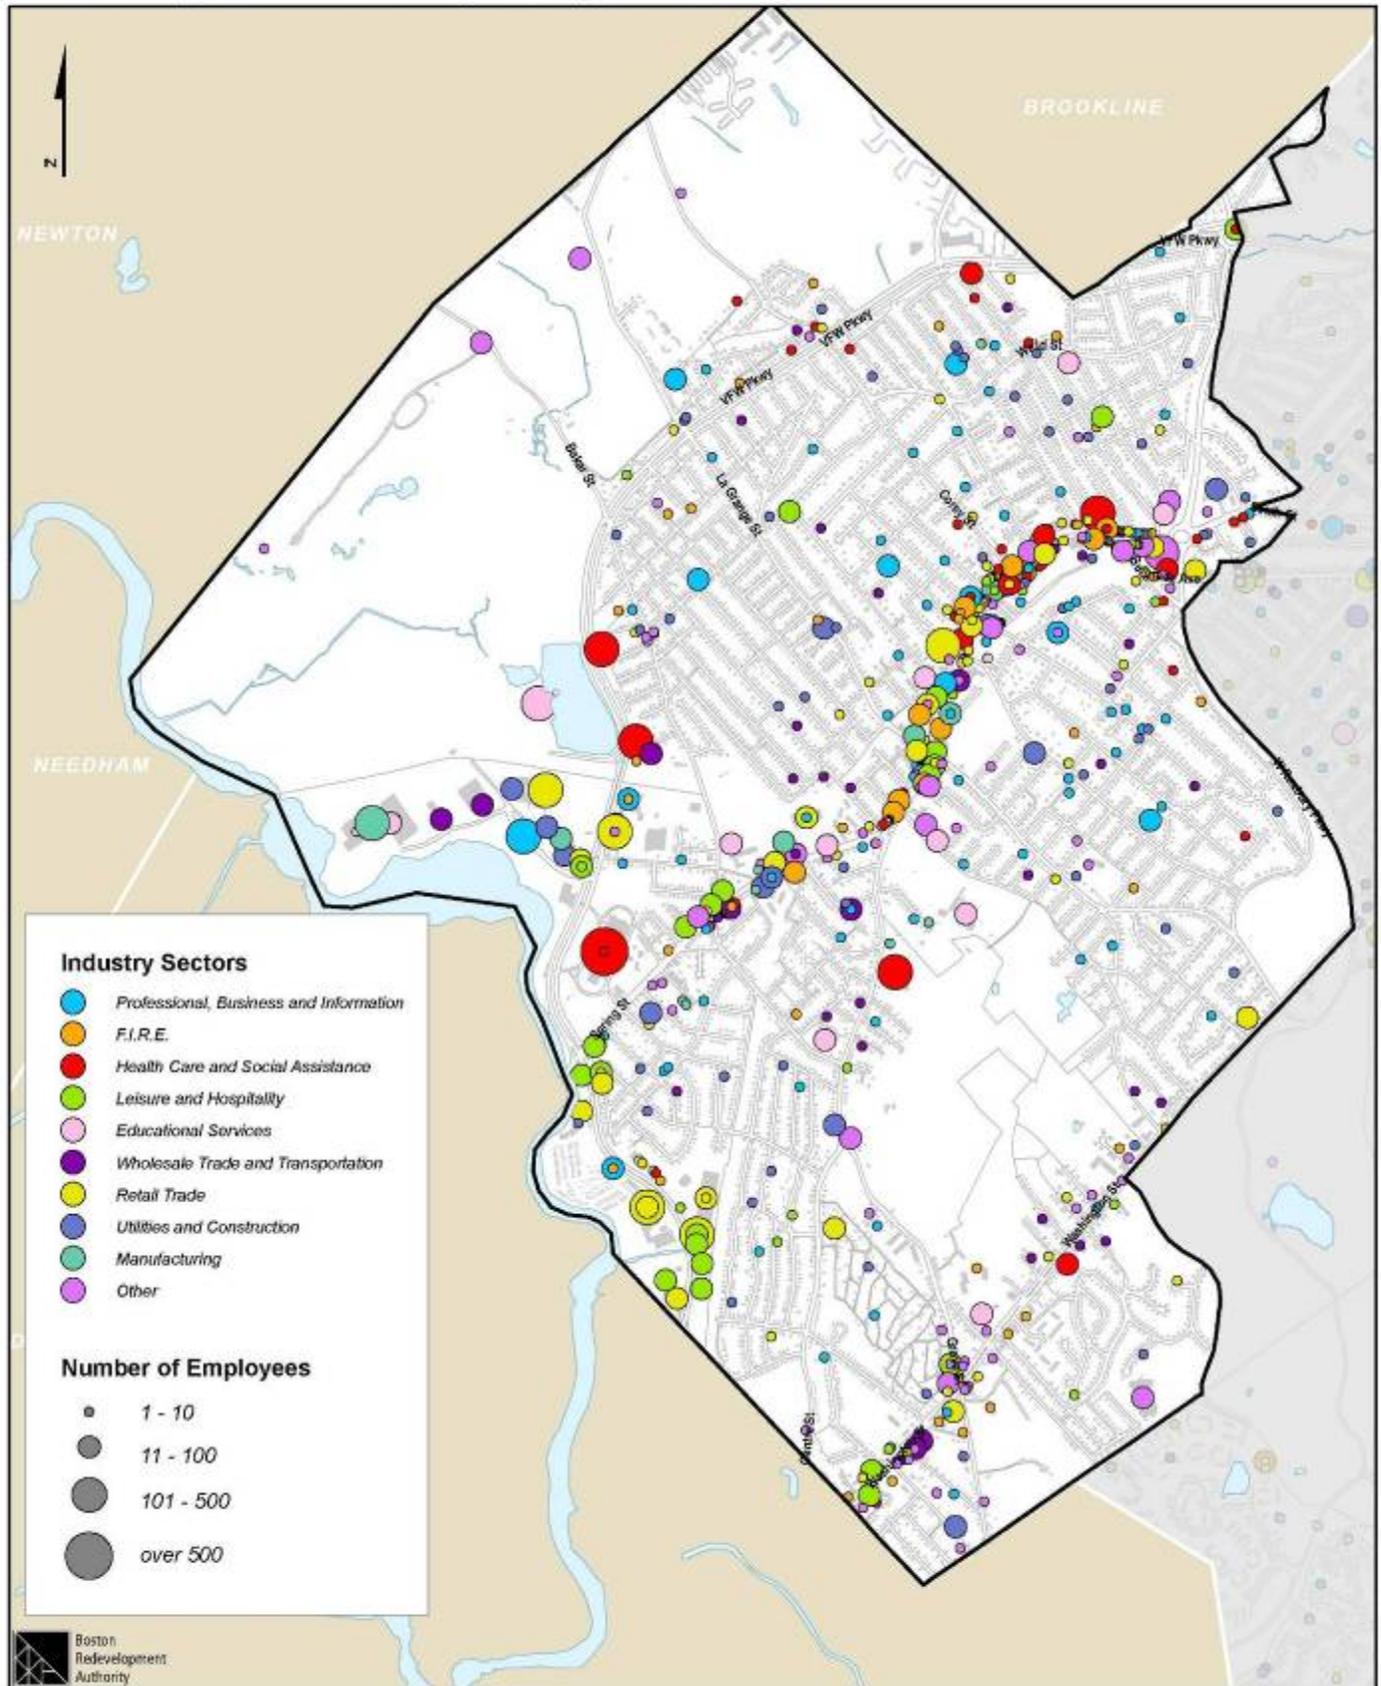

Industry Sector	Employment by Sector	Share of Employment	Establishments by Sector

## ***Appendix II - Data and Methodology***

The data for this report is published by the U.S. Census Bureau, *County Business Patterns*, available at <http://censtats.census.gov/cbpnaic/cbpnaic.shtml>. Data available at the ZIP Code level of geography includes the total employment for private sector, payroll jobs and the number of business establishments by industry and employment-size class. Coverage excludes self-employed workers, employees of private households, railroad employees, agricultural production employees, and most government employees except for those working in wholesale liquor establishments, retail liquor stores, federally chartered savings institutions, federally chartered credit unions, and hospitals. The County Business Patterns survey is conducted annually in March. The data used in this report is from March 2002.

Industries are defined by the North American Industrial Classification System (NAICS). Size classes represent ranges of payroll employment count. The actual number of jobs in each industry or size class is not directly stated in the data due to disclosure restrictions—aimed at protecting individual businesses' privacy—, but can be estimated from the number of establishments.

The estimation method used in this analysis as well as an example table is found below. Table A1 provides an example by illustration, using the method for ZIP Code 02125 in Dorchester and NAICS industry 61 (Educational Services).

The first step in the analysis was to identify the total employment by ZIP Code. Total employment is the only employment figure given at the ZIP Code level, so our estimates for each industry had to add up to this total. The next step was to compute mid-points for each of the employment size-classes; the number of establishments in each range was then multiplied by the employment mid-point to obtain an estimate of the number of employees in this industry.

This procedure was performed for each industry row to obtain a provisional, unadjusted estimate of employment within a ZIP Code across all industries. In the simplest cases, where there were no largest employers (1,000 jobs or more), the actual total employment figure provided was divided by the total unadjusted mid-point estimate to arrive at an adjustment factor. This adjustment factor was multiplied by each industry employment estimate to arrive at the final estimates for this ZIP Code area. Usually, mid-point estimates tended to overstate actual employment, as seen in Table A2. On average, actual total employment reported for a ZIP Code area was 13% lower than the number estimated by employment range midpoints.

The mid-point method could not be used for establishments in the largest, open ended, size class (1,000+). Employment for these establishments was determined by identifying each individual establishment where possible and using the employment figure supplied by the company or derived from some other source. It was not possible to find exact employment data for all the largest employers. For neighborhoods that had unidentified largest employers, another method of estimation was necessary. First, we assumed that the mid-point estimates of the employment-size classes were overestimating total

employment. Second, we multiplied these mid-point estimates by 0.87 because this was the average margin of error for neighborhoods where the largest employers were identified. Next, total employment was subtracted from the adjusted mid-point estimates, the difference represented total employment for largest (1,000+) establishments. The final step was to divide and distribute the largest establishment employment by the largest establishments in the neighborhood.

Next, ZIP Code areas were combined to form 15 neighborhoods, which have different boundaries, but approximate as close as possible, Boston Redevelopment Authority's Planning Districts. Then, for each neighborhood, the number of establishments and number of employees by type of business were computed by adding the individual ZIP Code results.

Two tables show 1998 numbers based on BRA calculations using employment data from County Business Patterns (CBP) and the Massachusetts Division of Unemployment Assistance (DUA). First, the county-to-city ratio (i.e. Suffolk employment/Boston employment) is calculated using 1998 employment data from DUA. Applying this ratio to the 1998 Suffolk County employment numbers from CBP calculates CBP Boston employment figures.

To adjust for any discrepancies between this method and that used for the year 2002 employment data, a distortion factor is calculated using 2002 numbers from CBP and the DUA. Finally, applying the "distortion" ratio (at the sector level) to the 1998 CBP calculated numbers for the City of Boston provides the adjusted 1998 employment numbers. These adjustments allow for a direct comparison of the employment figures for the city in 1998 and 2002.

Table A1

Industry Code Description	Number of Employees 2002 CBP Suffolk	Number of Employees 2002 DUA Boston	Number of Employees 2002 DUA Suffolk	DUA Ratio	Number of Employees 2002 CBP Boston (Calc)	Number of Employees 2002 CBP Boston (Report)	Adjustment Factor
